WEATHER OF CONCERN

NORTHERN CALIFORNIA

- Excessive Heat Warning in effect through late night Saturday for portions of Siskiyou County.
- Wildfire smoke from the Dixie fire and other area wildfires west of the Sierra will continue to produce smoke and haze for much of northern California. Impacts to air quality and visibility expected again by Wednesday morning. Get current and forecast Air Quality for your area on AirNow.gov.

SOUTHERN CALIFORNIA

- FLASH FLOOD WATCH in effect through Wednesday evening for portions of Southwest California.
 - Apple and Lucerne Valleys
 - Riverside County Mountains
 - San Bernardino County Mountains
 - San Diego County Mountains
 - San Geronio Pass Near Banning
 - Apple and EL Dorado (burn scars) Recently burned areas will be particularly susceptible to flash flooding and debris flows.

WEATHER KEY POINTS

08/11/21 - 08/17/21

Wednesday-Tuesday

- Heat builds over much of interior southern California, the Central Valley, and northern valleys through the weekend
 - Moderate to locally high heat risk impacts will become increasingly likely for interior areas of the state through the week
 - Note that temperatures closer to the coast will remain much cooler as winds remain onshore most days
- Fire weather conditions remain locally elevated most afternoons and evenings across the foothills and mountains where winds will occasionally gust 25 to 30 mph, though widespread strong winds are not expected over the next 7 days
- Scattered monsoon thunderstorms are possible across southern portions of the state as well as the Sierra through mid and late week. A few storms are also possible across far northern California from late week into the weekend.
 - A few storms Wednesday could produce heavy rainfall over southern California, which could lead to local flash flooding, especially over the mountains
 - **This includes the Apple/El Dorado burn areas, where a Flash Flood Watch is in effect Wednesday**
 - Lightning could pose a risk for some new fire starts, especially over the Sierra and northern California where any storms are less likely to produce locally heavier precipitation
- Periods of thicker wildfire smoke will persist across northern and central California through the week, bringing reduced visibility and air quality at times. Thicker smoke may also lead to locally cooler temperatures at times.
